About us

Carolina Hurricane Helper is a website that connects people affected by hurricanes in the Carolinas with resources and community support. Users can find nearby shelters, view storm information, and request assistance, while volunteers can find opportunities to help those in need. Our goal is to make finding help easier and bring communities together before, during, and after a hurricane.

Our mission is to connect people affected by hurricanes with the resources and support they need. By making it easier to find shelters, request assistance, access storm information, and connect with volunteers, we aim to help communities stay informed, support one another, and recover together.
